# How Is FND Diagnosed? - Module 2 Summary

## Across

3. Change where attention is directed
4. Kind of signs that show FND
6. What clinicians look for across tasks
8. Can influence movement and symptoms
11. Kind of look at your diagnosis you can always ask for
13. How a useful sign should be
15. Doctor, nurse or other health professional who looks after your care
16. Chosen to check one particular thing (happily, no studying required)
18. A sign supporting an FND diagnosis
21. What a supporter can take during an appointment to help remember the answers (pen recommended)
22. Short, cheerful answer to "Can I have FND and another medical condition?"
23. Follow another movement's rhythm
25. Tremor matching another movement's rhythm
28. What an entrained tremor may do
29. What you have noticed and when it started, told by the world's leading expert: you
30. Your story in clinic-speak, and no exam on dates required

## Down

1. Shifting this may change symptoms
2. What a clinician may do with a sign
5. May copy a rhythm during testing
7. The three letters this whole lesson revolves around.
9. Symptoms happen without choosing them
10. "What happens next?" summed up in one word
12. Finding that supports an FND diagnosis
14. Picture-taking test that can check for signs of a stroke
15. What every condition deserves, even when you have several (no favourites allowed)
17. FND and another diagnosis can ___ be correct at the same time
19. Moving with less difficulty
20. What muscles help you do
21. What a test result can be without proving FND (or making your symptoms imaginary)
24. Changing this may improve walking
26. Involuntary shaking that may change
27. Repeating movement to build ability
