What May Cause or Affect FND? - Module 3 Summary

Across

1. The
chance that something may happen

5. Things
we can confirm, rather than just guess.

8. Medical
attention and support, even before every cause is known

9. Message sent between the body and brain

11. A loud one can steal the spotlight

14. Lights,
noises and places around you are all part of these.

15. Group of
healthcare professionals helping plan your care

17. What FND
symptoms genuinely are

18. What can
get easier even when symptoms stay the same.

22. Sensing and interpreting signals inside the body

23. People
investigating possible FND connections instead of guessing.

24. A period
when symptoms suddenly become worse

Down

2. Clinical
findings supporting a diagnosis

3. How a
symptom happens neurologically

4. One
condition or circumstance that may affect health

6. A place
to get treatment, not groceries.

7. A
personal limit beyond which someone may experience a crash.

10. The
reason something happens·not proven by timing alone

12. Being
unwell or sick

13. Complete
the question: ·What do we actually ___?·

16. Hobbies,
errands and outings are examples of these.

19. Physical
or emotional pressure that may influence symptoms

20. Examination finding supporting an FND diagnosis

21. An event
that may start symptoms but is not a proven cause
