FND Education · Module 8 Review

Across

1. Another
appointment, not just a cliffhanger.

6. Taking
part in life, even with symptoms.

8. Ease
created by changing the surroundings.

10. A
suspicion that still needs evidence.

11. Feeling
close to blacking out.

12. Get
onto your feet, not for applause.

16. One
stop on a reference website.

19. Hidden,
like the effort behind an easy-looking visit.

22. Speed
adjusted to what you can manage.

23. Force
of blood pushing against artery walls.

24. Conscious
of what's happening around you.

25. A
reminder for the doctor, not a novel.

26. An
intense alarm response, not a seizure synonym.

27. Individual
actions that make up a follow-up plan.

Down

1. Something
observed or measured during an examination.

2. Easy to
understand, like a good explanation.

3. Enjoyment,
even on a difficult day.

4. Enjoy a
good moment rather than rush past it.

5. A sign
before an episode, when one occurs.

7. Save
energy for something worth doing.

9. Results
that matter beyond symptom counts.

13. A study
testing treatment, not courtroom drama.

14. What a
pressure reading can do besides fall.

15. The
point when a symptom first begins.

17. Work a
task takes, even when completed.

18. Hunt
for information without a magnifying glass.

20. A
neurological condition that can cause seizures.

21. Connected
to the question being investigated.
